DETAILED ACTION

Ex parte Quayle

1. This application is in condition for allowance except for the following formal matters:

Figure 3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Response to Preliminary Amendment

2. The preliminary amendment received October 19, 2004 has been entered.

Priority

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

Art Unit: 1745

4. The information disclosure statements filed March 12, 2004 and October 19, 2004 have been placed in the application file and the information referred to therein has been considered as to the merits. Duplicate reference citations have been cross-out in the information disclosure statement filed March 12, 2004 have been considered as should be apparent to the information disclosure statement filed October 19, 2004.

Allowable Subject Matter

5. Claims 1-3 are allowed.

6. The following is an examiner's statement of reasons for allowance: none of the prior art of record appears to reasonably teach, suggest or render obvious the invention of claim 1.

JP 59226472 discloses a similar solid state battery as shown the figures but does not teach, suggest or render obvious the claimed protective film stepless smooth surface configured in the manner recited in claim 1. Furthermore JP 59226472 does not teach, suggest or render obvious the claimed solid state battery further having a part of an upper surface of the upper current collector which is not covered with the protective film and remains exposed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Art Unit: 1745

7. This application is in condition for allowance except for the previous identified formal matters.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
